4. A2.4G Remote Controller Instruction:

- The remote controller is not included in the normal configuration (please buy additionally if you need it).

Component of The Remote Controller:

1. Display Screen
2. “Address Code-1” Button
3. “Address Code + 1” Button
4. Power Switch
5. “Brightness+ 10” Button
6. “Brightness- 10” Button
7. “Brightness +1 ” Button
8. “Brightness- 1 ” Button
9. “Sleep/Wake ” Button
10. Battery Slider

Setting the Address Code
1. There are two address code buttons in the remote controller, which can adjust 100 codes varied from "00 to 99". When pressing any address code button, the address code setting page will be showed on the screen (Like "L-00" ). Then you can press "on/off" to adjust the address code freely, and make sure the address code showed on screen is the same as the code of the controlled light. (Like the address code is 03, then the address code on screen should also be "L-03") . Finish the address code setting.

Adjusting the brightness of the light
There are four brightness adjustment buttons in the remote controller, which can control the brightness of lights from 0% to 100%. When pressing any brightness adjustment button, the brightness setting page will be showed on the screen (Like "034"). Then you can press "on/off" to adjust brightness of lamps quickly. If you want to adjust the brightness slightly, you can press the " " button or " button to adjust the brightness to the best state you want.

Sleep and Wake Function of Remote Controller
When the display screen on, pressing the " button would let remote controller enter the sleep state, and the display screen went off. When the remote controller not on work for a period of time (after about 2 minutes), the remote controller will automatically enter the sleep state. In the meanwhile, pressing the " button can awaken the remote controller and the display screen will be lit up.

Notice:
1. In order to save the battery, please shut off the power switch when not use the remote control.
2. The battery should be removed when not in use for a long time. Otherwise, the battery mould and corrode inside circuit.
**Usage:**

⚠️ Please use it under the temperature below 45°C / 113°F.

1. Mount the lighting on a light stand (or rotate the U-bracket for 180°, then mount on the ceiling) and use the bracket to fix the power adapter on the tripods, with a suitable direction, then unfold the barndoor, make sure the power is off, connect with the DC power and turn on the light, then you can start to use it.

- Mount the lighting on a light stand
- Mount the lighting on the ceiling

2. Safety rope: For avoid falling by accident while using.

---
